Safety Policy

National Jet Express is a leading global provider of contracted aviation services to governments and commercial organisations and safety is the overriding consideration at all times.

National Jet Express goal is to achieve Zero Harm through a commitment by all stakeholders to continuously improve the management of safety and safety performance outcomes.

Our commitment is to:

- ✔ Support the management of safety by providing the appropriate resources to build and organisational culture that fosters safe practices, encourages effective safety reporting and communication, and actively manages safety with the same attention given to results as the other management systems of the organisation.
- ✔ Enforce the management of safety as a primary responsibility of all managers and employees.
- ✔ Clearly define for staff, managers and employees alike, their accountability and responsibilities for the delivery of the organisation's safety performance and the performance of our safety management system.
- ✔ Establish and operate hazard identification and risk management processes, including a hazard reporting system, in order to eliminate or mitigate the safety risks of the consequences of hazards resulting from our operations or activities to a point which is as low as reasonably practicable (ALARP)
- ✔ Ensure that no action will be taken against an employee who discloses a safety concern through the hazard reporting system, unless such disclosure indicates, beyond any reasonable doubt, an illegal act, gross negligence, or a deliberate or wilful disregard of regulations or procedures.
- ✔ Comply with, and, wherever possible, exceed legislative and regulatory requirements and standards.
- ✔ Ensure that there are enough people skilled and trained available to implement safety strategies and processes.
- ✔ Ensure that staff are provided with adequate and appropriate aviation safety information and training, are competent in safety matters, and are only allocated tasks in line with their skills.
- ✔ Establish and measure our safety performance against realistic safety performance indicators and safety performance targets.
- ✔ Continually improve our safety performance through management processes that ensure that relevant safety action is taken and is effective.
- ✔ Ensure externally supplied systems and services to support our operations are delivered and meet our safety performance standards.
- ✔ Ensure that the application of effective aviation safety management systems is integral to all our aviation activities, with the objective of achieving the highest levels of safety standards and performance.

The Safety Management System and supporting policies and procedures will provide the platform for National Jet Express to enable implementation of the Safety Policy.

Robin Furber
Interim Chief Operating Officer
Deputy Accountable Manager
National Jet Express
